EPEX SPOT sFTP server file specifications

The purpose of this document is to show the location of the relevant EPEX SPOT data files on the new EPEX SPOT SFTP server. The availability of the data described depends on the subscriptions taken. For more information, please contact your market data team at marketdata.sales@epexspot.com.

Table of contents:

1 Available data

1.1 File key information

- Please note that all files are in csv format.
- All volumes are in **MWh**.

1.2 Available market data

Please find below the list of available market data.

Market Area	Segment	Product	Update interval
All	Day-Ahead Auction (current year Y)	▪ Day-ahead auction prices & volumes ▪ Aggregated curves ▪ Block bids	Upon publication
	Day-Ahead Auction (Y-1 and beyond)	▪ Historical day-ahead auction prices & volumes, aggregated curves, block bid and index data	
	Intraday Continuous (current year Y)	▪ Trades ▪ Statistics	20-minute delay
	Intraday Continuous (current year Y)	▪ Trades ▪ Statistics ▪ Indices	End-of-Day
	Intraday Continuous (Y-1 and beyond)	▪ Historical continuous trades, aggregated results/statistics and indices	
	Intraday Continuous	▪ Orders	End-of-Day
	Intraday Auction (Current year Y) *Excepted Denmark, Finland, Norway and Poland*	▪ Intraday auction prices & volumes ▪ Aggregated curves ▪ Block bids	Upon publication
	Intraday Auction (Y-1 and beyond) *Excepted Denmark, Finland, Norway and Poland*	▪ Historical intraday auction prices & volumes, aggregated curves data and block bids	
France only	Capacity market	▪ Capacity market prices & volumes ▪ Capacity market aggregated curves	Upon publication

Market Area	Segment	Product	Update interval
Germany only	Phelix DE-AT index (current year Y)	▪ Prices & volumes	Upon publication
	Phelix DE-AT index (Y-1 and beyond))	▪ Prices & volumes	

Market	Segment	Product	Update interval
Guarantees of origin	GO auction (current year Y)	▪ Prices ▪ Volumes ▪ Indices	Upon publication
	GO auction (Y-1 and beyond)	▪ Prices ▪ Volumes ▪ Indices	

Q. How do you distinguish between current and historical data?

A. All market data from the previous year and beyond are considered as historical data. All market data of the current year is considered as current data. At the end of the current year, all data will be transferred from the “current” folder to the “historical” folder.

2 Data distribution support : sFTP server

2.1 Requirements

The technical requirements are:

- An Internet connection
- An ftp client application such as Filezilla (https://filezilla-project.org/) or WinSCP (https://winscp.net/eng/download.php) as a standalone application to download the requested market data files.

The access is attributed by the EPEX Spot market data department. The privileges depend on the type of subscription. In all cases, access is granted on a "***read only***" basis.

2.2 Connection

- Sftp host name: **ftp.epexspot.com**
- IP address: 195.254.158.152 (it is recommended to use the host name **ftp.epexspot.com** in order to avoid any impact if the IP address changes in the future)
- Protocol: **sftp**
- Port: **22** (please make sure your firewall allows connections through this port)
- User timeout setting: **60 seconds** minimum (there are certain times during the day when the traffic is very heavy, in which case the software may put some users on hold in order to remain stabilized. The user timeout setting allows to remain connected until you can access the data)

2.3 Folder Structure

The EPEX SPOT files are stored in the folder **/<market area>/.**

The following table shows the folder structure on the sftp server:

czc_and_flows	CZC	Nordic	YYYY	MM

(please note that Britned CZC and Flows data is no longer available)

GENERIC FOLDER STRUCTURE:

2.4.2 Intraday Auction

Germany:

The 15-minute call auction on the German Intraday market takes place daily at 3 pm, before the opening of the continuous Intraday market for 15-minute contracts (4 pm) and it covers the 15-minute contracts for the next calendar day from midnight on.

- **Prices**

Price	GBP, two decimals
Volume	MWh, one decimal
Sale/Purchase	Sell or Purchase as determined in the order book

2.4.3 Intraday Continuous

- **General principles**
  - All files are in csv format
  - The first line of the file (before the content) is a “file header”, displaying the name of the report, the short name of the market area (MA), the period covered by the report and the creation timestamp

- MA shows the short name as follows: AT, BE, CH, DE, DK1, DK2, FI, FR, GB, NL, NO1, NO2, NO3, NO4, NO5, PL, SE1, SE2, SE3 and SE4
- All volumes are in **MWh**
- All files include data for one CET/CEST delivery day
- All timestamps are in UTC

- **Continuous Statistics files**

  - The harmonized intraday continuous statistics files are created for each CET/CEST Delivery day (instead of one yearly file previously).
  - Hourly and block products are included in the same statistics file.
  - A trade is included in the intraday statistics file for a market area if:
    - An EPEX member is involved in the trade in the given market area
    - The trade is not an EPEX self-trade (trades for which the same counterparty is on the buy and the sell side)
    - The trade is not an OTC trade
    - The trade is not cancelled/recalled
    - The trade was not executed after Delivery start (After-market is excluded)

The EPEX SPOT intraday continuous statistics files are located either in the folder /<market area>**/**Intraday Continuous/Delayed/Results/**,** or /<market area>**/**Intraday Continuous/EOD/Results/**.**

File name: **Continuous_Statistics-MA-yyyymmdd-yyyymmddThhmmssssssZ.csv**
File format: csv

Data is published on a daily basis.
- Data updated every 20 minutes in the delayed offer
- The statistics are updated accordingly when there is a trade cancellation

Name	Continuous_Statistics-MA-yyyymmdd-yyyymmddThhmmssssssZ
Format	csv
Separator	Comma separated values
Update (Delayed folder)	Every 20 minutes
Update (EOD folder)	Approx. 01:00 CET/CEST everyday

Line 1: # Continuous Statistics – MA – yyyy-mm-dd - (yyyy-mm-ddThh:mm:ss.sssZ (update date and time in UTC)

Header	*Format*	*Content*
DeliveryStart	ISO8061 extended datetime (yyyy-mm-ddThh:mm:ssZ)	Delivery start of the contract, in UTC, including seconds
DeliveryEnd	ISO8061 extended datetime (yyyy-mm-ddThh:mm:ssZ)	Delivery end of the contract, in UTC, including seconds

Header	*Format*	*Content*
LowPrice	Decimal (compact formatting)	Lowest price traded for the contract in the given Market Area
HighPrice	Decimal (compact formatting)	Highest price traded for the contract in the given Market Area
LastPrice	Decimal (compact formatting)	Price of the last eligible trade on the contract in the given Market Area
WeightedAveragePrice	Decimal (compact formatting)	Volume weighted average of the prices of all eligible trades on the contract in the given Market Area
Currency	string	EUR or GBP
LastPriceTimeStamp	ISO8061 extended datetime (yyyymmddThhmmssssssZ.csv)	Timestamp of the last eligible trade on the contract, in UTC, including milliseconds
VolumeBuy	Decimal (compact formatting)	Total volume bought in on the contract in the given Market Area
VolumeSell	Decimal (compact formatting)	Total volume sold in on the contract in the given Market Area
VolumeUnit	string	MWH - Unit of the volumes, using UN/CEFACT recommendation 20 common code

Compact formatting of decimals means:

- No unnecessary leading & trailing zeros
- For numbers between 0 and 1, the decimal sign is preceded by a zero.
- No rounding/truncating
- Negative numbers start with a minus sign
- 0 is used for zero values

- **Continuous Transactions files**

A trade is included in the intraday transactions file for a market area if:

- An EPEX member is involved in the trade in the given market area
- The trade is included in the area of the EPEX member (not in the area of the other Nemo)
- The trade is not cancelled/recalled

File name: **Continuous_Trades-MA-yyyymmdd-yyyymmddThhmmssssssZ.csv**
File format: csv

Data is published on a daily basis.

- Data is updated every 20 minutes in the delayed offer
- The statistics are updated accordingly when there is a trade cancellation

Name	Continuous_Trades-MA-yyyymmdd-yyyymmddThhmmssssssZ
Format	csv in a zip file
Separator	Comma separated values
Update (Delayed folder)	Every 20 minutes
Update (EOD folder)	Approx. 01:00 CET/CEST everyday

Line 1: # Continuous Trades – MA – yyyy-mm-dd - (yyyy-mm-ddThh:mm:ss.sssZ (update date and time in UTC)

Header	*Format*	*Content*
TradeId	Integer	Identifier of the trade
RemoteTradeId	Integer	Identifier of the trade if executed on the SOB
Side	string	Identifies the side of the trade leg (BUY or SELL)
Product	string	Identifies the product the trade was created on (XBID, Intraday, Hour, Half Hour, Quarter Hour)
DeliveryStart	ISO8061 extended datetime (yyyy-mm-ddThh:mm:ssZ)	Delivery start of the contract, in UTC, including seconds
DeliveryEnd	ISO8061 extended datetime (yyyy-mm-ddThh:mm:ssZ)	Delivery end of the contract, in UTC, including seconds
ExecutionTime	ISO8061 extended datetime (yyyy-mm-ddThh:mm:ssZ)	Trading time of the contract, in UTC, including milliseconds
DeliveryArea	string	delivery area where the trade leg is located (short name) For Germany: ▪ DE1: DE-ENBW ▪ DE2: DE-AMP ▪ DE3: DE-TPS ▪ DE4: DE-50HZ
TradePhase	string	Phase the contract of the trade at the time of matching (CONT, SDAT or AUCT). The Trade phase is the trading phase at the time of matching: - CONT (continuous): for Germany it is from opening of the contract up to 30mins before the delivery (then the SDAT – Same Delivery Area Trading - phase starts). for other market areas, it is the full trading session, Auction phases excepted

Header	*Format*	*Content*
		- SDAT (Same Delivery Area Trading): it is the last 25 mins on the trading session in Germany [30 to 5 min before start of delivery], during which the 4 TSO control areas are decoupled - AUCT (auction): sometimes, when some cross-border capacity is released, an automatic auction is performed in the continuous market. In that case, the phase is “AUCT”.
UserDefinedBlock	string	Indicates if the trade is on a user defined block contract or not
SelfTrade	string	Indicates if the trade is a self-trade or if it is not possible to be determined (in case the counterpart is unknown)
Price	Decimal (compact formatting)	Price of the trade leg
Currency	string	EUR or GBP
Volume	Decimal (compact formatting)	Volume of the trade leg
VolumeUnit	string	MWH - Unit of the volumes, using UN/CEFACT recommendation 20 common code
OrderId	Integer	Reference to the order the trade leg is related to

- **Intraday Index files**

All indices are included in one file. Cross border trades with one leg (Buy/Sell) in the given market are taken into account in the calculation of indices. Cross-trades (i.e. self-trades; trades for which the same counterparty is on the buy and the sell side) are excluded.

The EPEX SPOT harmonised Intraday indices files are located in the folder /<market area>**/**Intraday Continuous/Indices/Intraday indices/**.**

All market areas:

File name: **Continuous_Index-MA-yyyymmdd-yyyymmddThhmmssssssZ.csv**
File format: csv

Data is published on a daily basis.

Name	Continuous_Index-MA-yyyymmdd-yyyymmddThhmmssssssZ
Format	csv

Separator	Comma separated values
Update	Approx. 01:00 CET/CEST everyday

Line 1: # Continuous Index – MA – yyyy-mm-dd - yyyy-mm-ddThh:mm:ss.sssZ (update date and time in UTC)

Header	*Format*	*Content*
IndexName	string	Index name to which the index is directly related or derived (IDFULL, ID3, ID1, RPD, RPD HH)
TimeResolution	string	Delivery duration or name of the defined block to which the index belongs to (60min, 30min, 15min, Base, Peak, Extended Peak, Industrial Peak, Offpeak)
DeliveryStart	ISO8061 extended datetime (yyyy-mm-ddThh:mm:ssZ)	Delivery start of the contract, in UTC, including seconds
DeliveryEnd	ISO8061 extended datetime (yyyy-mm-ddThh:mm:ssZ)	Delivery end of the contract, in UTC, including seconds
IndexPrice	Decimal (compact formatting)	Index calculated for each product
Currency	string	EUR or GBP
IndexVolume	Decimal (compact formatting)	Total volume in the given Market Area
VolumeUnit	string	MWH

- **Orders files**

Orders files display the M7 order book in a given market area.

The EPEX SPOT orders files are located in the folder /<market area>/Intraday Continuous/Orders/

All market areas:

File name: **Continuous_Orders-MA-yyyymmdd-yyyymmddThhmmssssssZ.csv**
File format: csv

Data is published on a daily basis.

Name	Continuous_Orders-MA-yyyymmdd-yyyymmddThhmmssssssZ
Format	csv in a zip file
Separator	Comma separated values
Update	Once a day. Approx. 10AM CET/CEST (D+1 for all market areas, except NL and BE where the files will be available at D+2 due to after-market trades)

Line 1: # Continuous Orders – MA – yyyy-mm-dd - yyyy-mm-ddThh:mm:ss.sssZ (update date and time in UTC)

Header	*Format*	*Content*

File format: xml

Name	PMBResults_BN-BN_YYYYMMDD_YYYYMMDDHHmmss_1.xml
Format	xml
Update	Approx. 13:00 CET daily

Element Name	*Description*
+mRID	Unique identification of the document
+revisionNumber	Version of the document being sent
+type	The coded type of the document being sent. **Valid values**: A31
+process.processType	The process type identifies the nature of the process that the document addresses **Valid values**: A15 (Capacity Determination)
+sender_MarketParticipant.mRID	Identification of the party who is sending the document.
+sender_MarketParticipant.markedRole.type	Identification of the role that is played by the sender. **Valid values**: A36 (Capacity Coordinator)
+receiver_MarketParticipant.mRID	Identification of the party who is receiving the document.
+receiver_MarketParticipant.markedRole.type	Identification of the role that is played by the receiver. **Valid values**: A07 (Transmission Capacity Allocator)
+createdDateTime	The date and time of the creation of the document.
+period.timeInterval	The start and end date and time for a given interval
+domain.mRID	The unique identification of the domain
+TimeSeries	List of time series
++mRID	A unique identification of the time series.
++ businessType	The identification of the nature of the time series. **Valid values:** A26 (Available transfer capacity (ATC))
++ product	The identification of the nature of an energy product such as power, energy, reactive power, etc. **Valid values:** 8716867000016 (Active power)

Element Name	*Description*
++ in_Domain.mRID	The EIC code of the area where the product is being delivered.
++ out_Domain.mRID	The EIC code of the area where the product is being extracted.
++ measure_Unit.name	The unit of measurement used for the quantities expressed within the time series.
++ curveType	The identification of the coded representation of the type of curve being described.
++Period	List of periods
+++ timeInterval	The start and end time of the period.
+++ resolution	The definition of the number of units of time that compose an individual step within a period. **Example:** PT60M expresses a 60 minute.
+++Point	Contains the list of quantities for each time interval
++++ position	A sequential value representing the relative position within a given time interval.
++++ quantity	The principal quantity identified for a point.

Separator	Comma separated values
Update	Auction Day at 11:30 AM CET/CEST

Line 1: #[Auction Date in the format DD/MM/YYYY] [File Creation Date Time in UTC in the format HH:MM:SS AM/PM]: Auction Indices and Results - Guarantees of Origin

First table (index data)		
Header	*Format*	*Content*
Indices	Text	Name of indices: • Europe Hydro • Europe Solar • Europe Wind • Nordic Hydro
ProductionPeriod	Mmm. YY (for a production period covering one month) Mmm. YY – Mmm. YY (for a production covering several months)	Production period for which the underlying energy was produced

First table (index data)		
Header	*Format*	*Content*
PriceIndex	Numerical with 2 decimal points and dots used a decimal separator	Index calculated for each zone in EUR
VolumeIndex	Numerical with no decimal points	Volume used in the calculation of the index

Second table (Market Results)		
Header	*Format*	*Content*
Technology	Text	Hydro, wind and solar
Country	Text	List of countries accepted: Austria, Belgium, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Ireland, Italy, Lithuania, Luxembourg, Netherlands, Norway, Slovakia, Slovenia, Spain, Sweden, and Switzerland
SubsidyScheme	Text	GOs can be linked to an asset under a subsidy scheme or not: ▪ For Buy orders, possible values for subsidy scheme are: “No” or “All” ▪ For Sell orders, possible values for subsidy scheme are: “Yes” or “No”
ProductionPeriod	Mmm. YY (for a production period covering one month) Mmm. YY – Mmm. YY (for a production covering several months)	Production period for which the underlying energy was produced
MarketClearingPriceBuy	Numerical with 2 decimal points and dots used a decimal separator	Buy price determined by the algorithm for the relevant product
ClearedVolumeBuy	Numerical with no decimal points	Total volume purchased
MarketClearingPriceSell	Numerical with 2 decimal points and dots used a decimal separator	Sell price determined by the algorithm for the relevant product
ClearedVolumeSell	Numerical with no decimal points	Total volume sold
Currency	Text	Euro
VolumeUnit	Text	MWh
