

Polish Multi-NEMO Day Ahead Market Coupling project Go-Live 2nd February 2021

07 January 2021 – The Transmission System Operator (TSO) and Nominated Electricity Market Operators (NEMOs) involved in the implementation of the Multi-NEMO Arrangement (MNA) project in Poland confirm the project's go-live date to be 2 February 2021.

The go-live of the Polish MNA is subject to successful completion of the simulation tests to validate operational readiness. At this advanced stage of the project, the revision of the go-live date enables additional testing to be undertaken to ensure robustness and reliability.

The project parties remain fully committed to implement the Polish MNA project in compliance with the Guideline on Capacity Allocation and Congestion Management, to bring competition in the core markets of Europe and support the aim of a fully integrated European Energy Market.

The project parties include the Polish Transmission System Operator PSE and three NEMOs: EPEX SPOT, Nord Pool and TGE.
