## Valuing flexibility to transform power systems

### The European Power Market

European-wide security of supply, competition and harmonised prices have been the goals the European Union wants to achieve through liberalising the European energy markets. One of the most visible results of this liberalisation is the emergence of energy trading and of power exchanges operating electricity markets.

# Accelerate the energy transition with Localflex markets

The Localflex market are **complementary to existing markets** to existing wholesale and balancing markets.

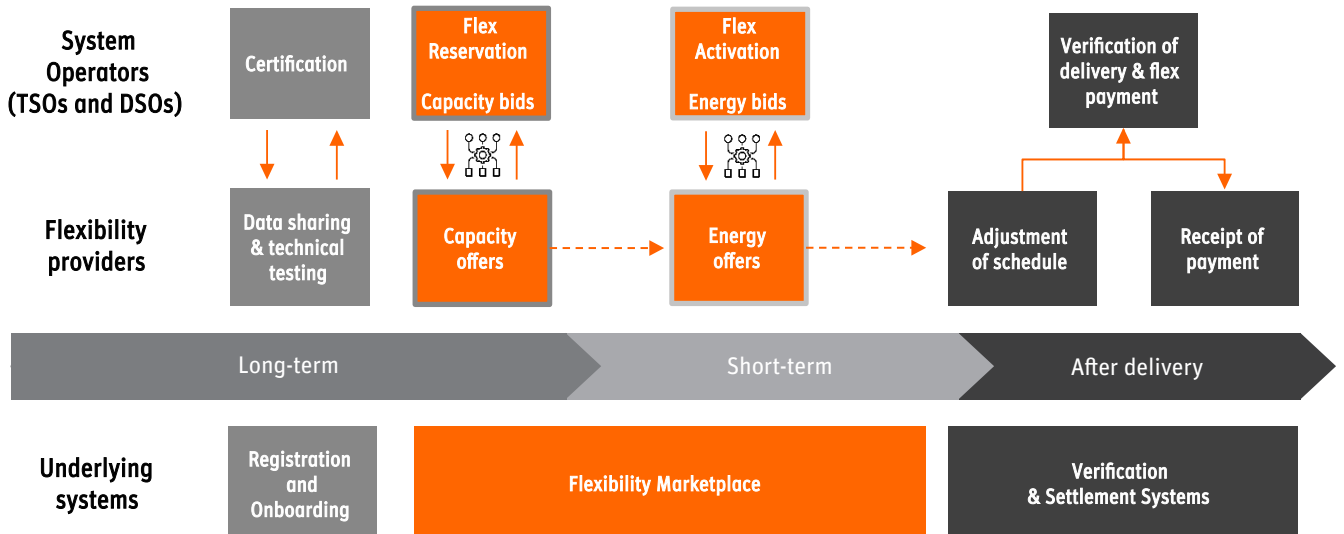

# Developing Localflex projects throughout the grid...

Localflex markets are about the implementation of a **market mechanism** which:

- **Efficiently centralises** local physical flexibility offers **where and when needed**
- Encompasses both **long-term reservation and short-term activation**
- Fosters the **development of European flexibility sources**

...to unlock the true value of flexible assets

## A standard business process

# Market Solutions for System Operators

We offer smart market solutions and tools to Transmission and Distribution System Operators as well as flexibility providers to meet the challenges of today and tomorrow.

- › Implicit cross-zonal auctions
